

Investment intelligence, engineered for precision.

Nxance tells every Indian investor whether their portfolio is actually working — and exactly how to fix it.

OHSN INTELLIGENCE LLP · INVESTOR DECK · SEPTEMBER 2026

THE PROBLEM

Retail India invests blind, loses quietly, and has almost nowhere to turn.

21.6 Cr

demat accounts have been opened in India. Most are held by people with no professional view on what is inside them.

SEBI Depository Statistics, Dec 2025

9 in 10

individual F&O traders lost money in FY25 — ₹1.06 lakh crore between them. Portfolios fail silently, for years.

SEBI, Profit & Loss of Individual Traders in Equity F&O, Jul 2025

< 1,000

SEBI-registered investment advisers serve 20+ crore investors — roughly one regulated adviser per two million people.

The Ken, SEBI-registered advisors are an endangered species, 2025

Money is flowing in faster than advice can reach it. The gap is not capital — it is the absence of an honest, affordable second opinion.

WHY NOW

Payments and lending were rebuilt. Wealth intelligence was not.

Savings are moving into markets at record speed, and the tools that explain those markets have not moved with them. Language models make explainable, one-to-one analysis affordable for the first time.

\$112B → \$550B

India's fintech market, 2024 to 2030

Cr in 2016

AMFI, monthly SIP contribution, record
high March 2026

THE SOLUTION

One app. Three engines.

Diagnose what you already own. Build what you should own instead. Have both explained to you in plain English or Hindi.

01 DIAGNOSE

Health Check

Connect or upload what you hold. Nxance scores it out of 100 and tells you what is wrong, in rupees: hidden costs, hidden overlap, risk you did not agree to, and whether you will reach your goal.

Free to run. ₹99 to unlock the report.

02 REBUILD

Construction

Give it your goal, your horizon and how much loss you can live with. It returns a specific portfolio, a monthly amount, and the reason behind every holding it chose — and every one it rejected.

Behind the subscription.

03 EXPLAIN

NxanceLM

The layer that turns the other two into sentences, plus a live market terminal you can question directly. It never invents a number — it can only explain ones the engines computed.

Every screen, English or Hindi.

THE PRODUCT

Built and clickable today, across all three engines.

Health Check — upload a statement, get a diagnosis

Dashboard — net worth, allocation and sentiment in one view

Construction — an optimised plan, with the reasoning shown

NxanceLM — ask a question, see the verification behind it

70 engines compute. The AI only explains.

HEALTH CHECK · 26

- XIRR, time-weighted returns
- VaR, CVaR, Sharpe, Sortino
- Maximum drawdown
- Jaccard holdings overlap
- Monte Carlo, 10,000 paths
- Hidden Markov regimes
- FinBERT news sentiment
- Cost and fraud screens

CONSTRUCTION · 26

- Mean-variance optimisation
- Black-Litterman views
- Ledoit-Wolf shrinkage
- Goal and drawdown limits
- Every rejection recorded
- Cost and fraud screens
- VaR, CVaR, Sharpe on the mix
- Monte Carlo goal probability

NXANCELM · 18

- Results into English or Hindi
- Answers on your own holdings
- Writes report explanations
- Live market and news terminal
- Nxance Explain on any chart

NUMBER GUARD

Every figure must trace back to an engine output. Number Guard blocks any number the model was not handed — verified source, confirmed inputs, checked calculation, audit ID.

STACK

FastAPI · Supabase · Railway. Lean by design, sized for a subscription product.

WHY WE WIN

Diagnosis first. Reasoning shown. A flat fee.

Diagnosis before advice

Everyone else starts by selling you something new. Nxance starts with an honest read of what you already own — the cheapest way to earn the right to advise.

Explainable, not a black box

Every output carries its data, its method and its stated limits. Number Guard blocks any figure the engines did not compute, so the AI explains but never invents.

Subscription, not commission

A flat ₹399–1,499 a month. No cut of your assets, no trail commission, no lending cross-sell. Our revenue moves with your renewal, not your balance.

Broker- and asset-agnostic

Works across any broker and any asset class — not tied to one execution rail or a single model-portfolio format.

What makes it hold: answers stay tied to computed evidence; the product improves as consented, anonymised usage data compounds; and commission-free pricing is structurally hard for distributor-funded incumbents to copy, because trail commissions pay their bills.

COMPETITIVE LANDSCAPE

Nobody else starts with a diagnosis, shows its reasoning, and charges a flat fee.

	Kalpi.ai	Wright Research	Ionic Wealth	MyFi	Nxance
Serves	DIY strategy builders	Managed money, RIA/PMS	HNI/UHNI, ₹1–25 Cr	Retail MF and stock investors	Every investor, first SIP to HNI
Pricing	Free, then premium tiers	~1.5–2% of assets	PMS/AIF fees, accredited only	Free, monetised via lending	Flat ₹399–1,499 a month
AI depth	Rule-based builder	ML factor models	Insights on synced MF history	Chat over fund scores	70 engines, every figure verified
Position	Systematic investing for DIY	AI robo-adviser	Angel One-backed, accredited	Review as a lending hook	Diagnosis-first, conflict-free

Dezerv (6 lakh+ users) is HNI-oriented, advisory-fee and relationship-manager-led — cited on the market slide as demand proof rather than as a direct comparable. Sources: company websites and public app listings, 2026.

MARKET

Sized as a fee pool, not a pile of assets.

Subscription, AUA or licensing — all three are revenue per rupee of assets influenced.

TAM · EVERY INSTRUMENT

₹68,500 Cr

a year · ~US\$7.1 bn

Every digitally held instrument an Indian can own — ₹80.3 L Cr in funds, ₹66.6 L Cr in listed equity, ₹11.3 L Cr in AIFs, REITs, InvITs and gold bonds — at 50 bps, 15 on treasury.

SAM · ACTIVE MONEY ONLY

₹41,200 Cr

a year · ~US\$4.3 bn

Dormant money stripped out. Only the 4.60 crore who actually transact, the trusts and investment companies already buying advice, and treasury a B2B motion can reach.

SOM · WHAT WE CAN COVER

₹165 Cr

ARR · ~US\$17 mn

Coverage, not ambition: what the funded team and channels can serve by year five — 2.1 lakh subscribers, ₹33,000 Cr advised, or 66 licensees. 0.4% of SAM.

WHAT THE ₹158 LAKH CRORE IS INVESTED IN

Amounts in ₹ lakh crore. NSE Ownership Tracker Q1 FY26 · AMFI Feb 2026 · SEBI · RBI. Promoter stakes, institutions and PMS excluded.

BUSINESS MODEL

Free diagnosis, ₹99 to unlock it, then a subscription.

Tier	Price	What it opens
Health Check	Free	Run the diagnosis on holdings you already own
Full report unlock	₹99 once	The complete report — a paid-intent qualifier, not the business
Starter	₹399/mo	2 portfolios, Health Check plus Construction, core engines
Growth	₹899/mo	2–5 portfolios, deeper engines, re-checks and rebalancing
Pro	₹1,499/mo	5–10 portfolios, all engines, full NxanceLM access

THE THIRD LAYER

HNI advisory fees and licensing the engines to distributors, once usage and behaviour data compound.

OVER 18 MONTHS

75 → 600 → 2,200 subscribers, ₹76.05 lakh collected — shown as upside, not netted off the ask.

A free hook that converts into paid depth.

01	The free Health Check	The diagnosis is the acquisition. It costs nothing to run, surfaces a problem the user can see in rupees, and the ₹99 unlock turns curiosity into a first payment.
02	Performance marketing	Paid search and social aimed squarely at self-directed retail investors and recent demat-account holders, measured against unlock rate rather than installs.
03	Communities and educators	Telegram, Reddit and YouTube investing communities, plus partnerships with financial educators who already hold this audience's attention.
04	Distribution partnerships	Brokers, fintech apps and distributors as an embedded channel — opened only once the direct consumer product has proven it retains.

WHERE WE ARE

“Everyone tells you to put your money to work. Nobody tells you how — or whether the money you have already put in is working.”

The same sentence, in one form or another, in almost every one of our first conversations. The engines exist because of it.

12

investor and user
conversations that
pressure-tested
the problem

8 of 12

said they would pay for

BUILT

A full clickable frontend across all three
engines, demoed but not yet public.

NEXT

The quant engines and the Number
Guard layer — what this raise funds.

ENTITY

Ohshn Intelligence LLP, incorporated
July 2026. Private Limited at close.

18-MONTH ROADMAP

Six build phases. Three capital tranches.

Build phase	Months	What ships	Gate that must clear
Foundation	M1–3	Portfolio import, health score	100 interviews, 30–50 testers
Alpha	M4–6	Risk profiling, Monte Carlo	100+ analyses, 40% repeat use
Closed beta	M7–9	Payments, model monitoring	300–500 users, 25–50 paying
Public V1	M10–12	Production build and reporting	1,000+ users, early revenue
Simulation	M13–15	Market replay, stress tests	Validated scenario library
Institutional	M16–18	Adviser platform, APIs	3 institutional pilots, 5,000 users

CAPITAL RELEASES ON ITS OWN CLOCK — THREE TRANCHEs, 6 MONTHS EACH

Tranche 1 · M1–6

₹2.74 Cr

+6% equity

Tranche 2 · M7–12

₹5.27 Cr

+7% equity

Tranche 3 · M13–18

₹4.48 Cr

+7% — 20% in total

Capital and equity release together, only once the prior tranche's deliverables are evidenced. Tranche 2 carries the SEBI–RIA deposit and the full ₹1.33 Cr contingency, which the round closes with intact. Tile widths show each tranche's share of the round.

TEAM

Four founders, full-time, one product.

Abhishek Rajput **Founder & CEO**

Investment analyst and product builder. Trades equity and derivatives, has run live portfolios, and has built sales teams that beat target.

Raghav Kripasthya **Co-Founder & CTO**

AI engineer and data scientist. Has shipped intelligent systems across healthcare, defence and computer vision. Python, PyTorch, AWS.

Deepesh Khemka **Co-Founder & CIO**

CFA Level III (charter pending) with deep capital-markets expertise. Built and scaled businesses before moving into wealth management.

Bhaskar Pandey **Co-Founder & COO**

Technology strategist across AI/ML, enterprise automation and data platforms. Has shipped 28+ npm packages for AI tooling.

40

people at exit headcount

25

costed hiring lines in the budget

₹5.83 Cr

budgeted people cost over 18 months

43%

of that pool is investment and research

THE ASK

₹12.49 Cr for 20% — ₹49.95 Cr pre-money.

₹12.49 Cr

Operating burn, SEBI-RIA deposit
and contingency

18 months

of runway, backend build to
institutional pilots

₹62.44 Cr

post-money, investor ownership at
close 20.0%

WHERE IT GOES

Building and growing 72.6% · ₹9.06 Cr

Running and protecting 27.4% · ₹3.41 Cr

₹11.10 Cr operating burn + ₹1.33 Cr contingency + ₹5 lakh refundable SEBI-RIA deposit = ₹12.49 Cr. Bars are scaled to the largest line. Projected subscription revenue of ₹0.76 Cr is upside, not netted against the ask.

FINANCIAL PLAN

Burn ramps with the build, not ahead of it.

Monthly operating cash use, ₹ lakh, Month 1 to Month 18

₹27.6L

Month 1, before the team scales

₹61.97L

average monthly burn over 18 months

₹76.91L

peak, in Month 18 at full headcount

₹11.10 Cr

total 18-month operating requirement

EXIT ROUTES

Four acquisition routes. One path to listing.

The engines can be licensed as readily as they are used — which keeps more than one route open.

Strategic acquisition

Brokers, AMCs and banks already own the customer relationship that Nxance makes stickier.

Wealthtech consolidation

An established advisory or wealthtech platform acquiring the engines and the user base.

Infrastructure buyer

An AMC, insurer or bank taking the engines as the intelligence layer behind its own product.

Secondary sale

Early investors taking partial or full liquidity in a later growth round.

The long path: IPO

SEBI-RIA registration, then a scaled advisory book, then a public listing.

THE VISION

Every rupee, properly understood.

Become the intelligence layer behind India's financialising wealth — the one place any investor, from first SIP to HNI, goes to find out whether their money is actually working.
